

# AQUATIC SOLUTIONS & RECOVERY MARINE SHRINK WRAP

## OVERVIEW

### 1. Project Background and Description

*A.S.R. Mobile shrink wrap service will perform marine shrink wrap for \_\_\_\_\_ on \_\_\_\_\_ vessel.*

### 2. Project Scope

**i** *A.S.R. will use top quality marine grade shrink film and accessories to cover the vessel from bow to stern including parts of the outboard motor. The covering will consist of stanchions where appropriate, center line support banding, a perimeter band and belly bands as needed. The process will take place at the customer's place of choosing within the A.S.R. service area. All consideration will be taken to preserve the vessel's present consideration and the future transport of the covered vessel by it's owner before seasonal unavailing. Two standard vents for circulation will be offered at no extra charge. Vessel size includes pulpit and platforms.*

### 3. High-Level Requirements

**i** *To facilitate the above mentioned scope of work, a minimum of 4 feet clear access to the vessel on all sides is necessary unless otherwise agreed. The vessel should be clear of all hazards and clutter. The vessels owner must take all precautions to protect and winterize the propulsion, combustion, water and electrical systems before wrapping film is applied.*

#### 4. Specific Exclusions from Scope

**i** Marine shrink wrap is intended as a durable custom fit covering. It is warranted against tears for 12 months in reasonable and customary conditions. It is recommended during times of excessive snow fall, for the owner to maintain the cover with a snow brush to prevent cave-ins. In the rare case of defects or tears, please notify A.S.R. immediately, so repairs can be made as needed. Shrink wrapping is not a substitute for full winterizing procedures. All antennas, fishing rods and outriggers should be securely stowed or removed as needed. The vessel should be dry and free of combustible gases in the bulkheads and bilge.

#### 5. Implementation Plan

**i** A.S.R. will arrive at an approximate time, conditions, permitting and will stay until shrink wrapping is complete. A booking deposit is requested and can be paid online if necessary. Deposits are fully refundable if cancelled before 24 hours of arrival time. A 50% fee will be assessed if cancelled during 24 hours window. All jobs can be rescheduled due to weather without penalty.

#### 6. High-Level Timeline/Schedule

**i** This vessel is scheduled for the Date \_\_\_\_\_ Time \_\_\_\_\_  
Please have clear access to the vessel.

### APPROVAL AND AUTHORITY TO PROCEED

We approve the project as described above, and authorize the team to proceed.
